What would happen if **you could** discover the strategies to **achieve** any goal you desire....**NOW!**

Jump Start 2009

Propel Yourself To Action

What would it feel like if you had a map to start off the new year?

Sometimes you could be an inch away from reaching your goals, what will it take to get you there?

W. Clement Stone said, "Thinking will not get things done, but action will."

Create goals. Take Action.

The best way to increase your success is to do something about it, take action.

The best way to predict the future is to create it. Set your goals and create a more successful future. With a road map for the new year, you are on a highway racing towards success.

Invest 2 hours in yourself and start developing a blue-print that provides you with a road map to follow your life plan. Who's plan are you following?

We will be looking at the 10 ports of your life with the Wealth Check-Up.

This special event is held in a private setting and will be limited to only 20 people.

Also, come take a look at iLearningGlobal.
Click on iLearningGlobal for more information.

*Mary Ann has been selected by the Technical Advisory Council to address this topic with the top 40 global CIO's.

Mary Ann McIlraith

Over 20 years experience in information technology, human resources, and organizational development. She covers the complete human capital management (HCM) implementation project and leadership life-cycle.
